

We build client success from the inside, outward.

From small fixes to massive transformations, Macro Solutions helps government organizations select, implement, integrate and maintain critical business solutions.

With **Enterprise Solutions** and **Strategy**, we support the complete systems development life cycle—from planning to implementation, operations and maintenance.

Our **Agile Services**, which encompass application development, services management, and transitioning; employ field-tested Agile and scrum methodologies, and CMMI Maturity Level 3 processes.

Through **Management & IT Consulting**, we cover program management, strategy development and business process improvement through the application of best practices and new technologies.

All our services are carefully tailored to bring short- and long-term client goals into perfect alignment, with intimate involvement from our senior leadership team at every stage of the project—a guarantee we call Macro Assurance.

At our core, we're a relationship company.

We work closely with our clients and business partners to ensure strong and trusted relationships in all aspects of our business. Our policies and procedures are mature and robust—commensurate with our status as a seasoned business and IT consultancy—yet as a small business, we remain agile and responsive to our clients' evolving needs.

Some of our proudest work includes:

U.S. Federal Financial Regulatory Agency

We put our revolutionary Agile-based transition management process to the test, successfully migrating all legacy service management operations and application development activities on-time and under budget, garnering the highest rating of any firm engaged with this organization, past or present.

U.S. Defense Information Systems Agency (DISA)

We provide DISA with comprehensive financial services support to the Office of the CFO. As part of the services operation, our team successfully transitioned the Financial and Business Management Line of Business services for the Enterprise Services Directorate and Chief Financial Executive organization as planned, on-time and on-budget.

U.S. Department of Defense Agency (DoD)

We migrated a DoD agency to the cloud with virtually no downtime or disruption, enabling them to meet their DoD mandate in a fully auditable and FISMA-compliant environment. With the help of specialized expertise, at the intersection of regulation and code, we migrated the agency's 1500-strong global user community relying on its business systems software to procure all goods and critical services, meeting technical objectives on-time and on-budget.
