Client Focus

“

Macro Solutions has been our “go-to” partner for long-term existing work, work that is new to us, and work we’re intending to capture. We appreciate Macro’s ability to understand the work objective for each client and quickly engage to provide the requested support. Much of our work requires technical experts who come with active clearances,

IT certifications and specific years of experiences. We are always impressed when Macro Solutions brings the very best talent to the table. Throughout our years of partnership, we work closely as a team and have deepened our relationship. We will continue to utilize Macro Solutions for our resource needs. - **Partner Supporting Navy**

”

Highlights

U.S. Army

The Army Integrated Personnel and Pay System embarked on Agile methodology to increase speed of delivery and integrate stakeholder feedback in their processes. Through Agile methodology they were divided into scrum teams. This Agile adoption is unique due to its size and complexity and allows for full integration of teams to work in parallel with functional team members and developers.

Department of Defense Agency (DoD)

Macro Solutions migrated DoD business applications to the cloud with virtually no downtime or disruption, enabling them to meet their DoD mandate in a fully auditable and FISMA-compliant environment. With this specialized expertise, at the intersection of regulation and code, we migrated the agency’s 1500-strong global user community relying on its business systems software to procure all goods and critical services.

Defense Information Systems Agency (DISA)

We provided core functional, financial and customer management expertise in support of the Defense Working Capital Fund (DWCF) and all DISA computing activities. We also provided technical support to our DISA client, including system analysis, programming, test, and implementation of legacy financial systems. In addition, we performed Business Process Reengineering (BPR) and made recommendations on process and system improvements.

We work closely with our clients and business partners to ensure strong and trusted relationships are established at the onset of every opportunity. We are mission-focused, agile and responsive to our clients’ evolving needs.

Lets collaborate together to support your mission!
