

INTELLIGENT SOLUTIONS

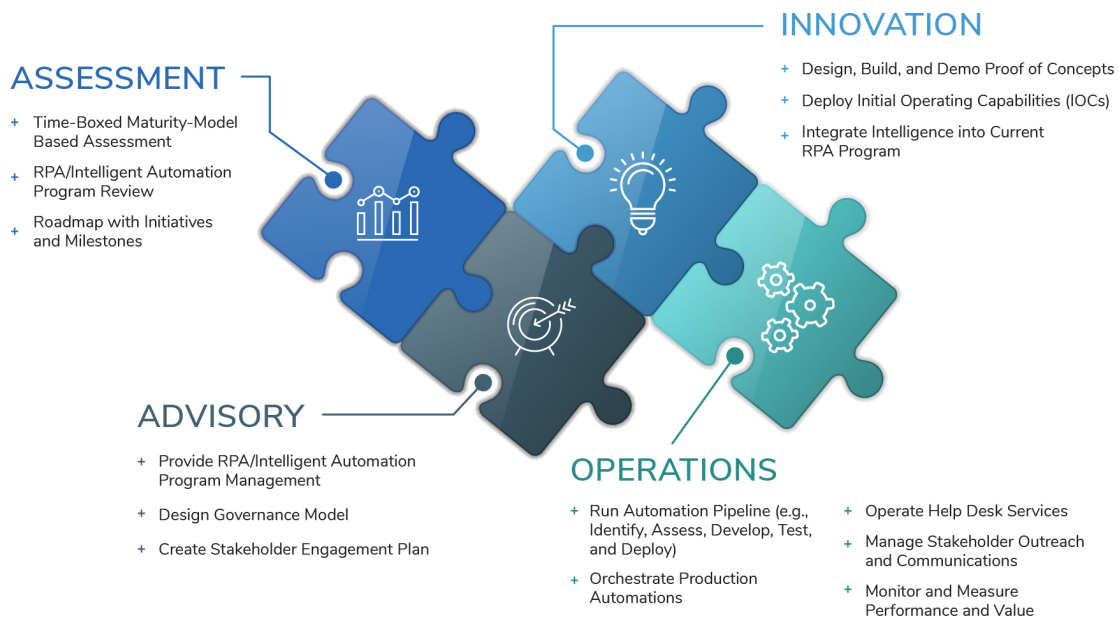

Reimagine How Work is Done

Say goodbye to mundane, manual, costly processes and workflows. Transform the way you work and meet government's biggest challenges with automation.

Apply the potential of intelligent automation – Robotics Process Automation (RPA), data science, machine learning, and AI – to strategic enterprise-wide initiatives and realize value quickly.

MACRO SOLUTIONS

has more than 20 years' experience in implementing, enhancing, integrating, and supporting mission-critical ERP systems – including Workday, PeopleSoft, Oracle and Salesforce – across government.

MEET GOVERNMENT'S BIGGEST CHALLENGES WITH AUTOMATION

- Rapidly deploy impactful automations across business areas
- Integrate and streamline complex workflows, scaling to meet user demand
- Seamlessly integrate data from disparate sources
- Reduce low value workload
- Create a simpler, more connected self-service experience for team members
- Better predict and forecast project performance and ensure better outcomes

ABOUT

Macro Solutions is a woman-owned information technology and management consulting firm that helps companies and government organizations select, implement, modernize, integrate and maintain critical end-to-end business solutions.

CLIENT WINS DOD AGENCY

We provided intelligent automation leadership for a financial center within a **Department of Defense (DoD) agency**. Using an Agile methodology we developed a proof-of-concept using UiPath's Document Understanding platform to demonstrate how RPA and machine learning can automate mundane parts of the invoice and utility bill manual-based processes - while improving accuracy, increased throughput of finance and accounting operations, and reducing costs.

Conducted over eight-weeks - with two-week Sprints - the project is an example of how Macro can deliver immediate business value through our Agile, DevOps methodology.

Intelligent automation is critical to the center's ability to efficiently process 220,000 invoices per year, which previously consumed roughly 11,000 human labor hours or \$715,000 of labor costs.

OUR PROCESS

Our end-to-end services help you:

- Assess your current automation program
- Recommend opportunities for applying automation quickly and cost effectively
- Model and map your automation journey
- Integrate intelligent solutions with services and workflows
